

Dr. Suneeta Dubey is a senior glaucoma specialist with over 30 years of experience in clinical care, surgical innovation, academic training, and quality leadership. As the Medical Director at Dr. Shroff's Charity Eye Hospital, she has led high-volume tertiary glaucoma services and pioneered the introduction of MIGS techniques like Trabectome in India. She has a special interest in pediatric and refractory glaucomas, and her research contributions span over 150 scientific publications. Dr. Dubey is currently the Principal Investigator of an ICMR-funded project investigating exosome-based biomarkers in primary glaucoma, aligning her work with translational genetics in eye disease. She also serves on national expert panels and has mentored over 100 fellows globally.
